

ASHISH NAMDEO

Software Engineer | Backend & Full-Stack Developer

747-244-2908 • ashish.namdeo.1697@gmail.com • <https://linkedin.com/in/ashishnamdeo16> • California, USA | Open to Relocation

Summary

Software Engineer with **4+** years of experience specializing in enterprise backend systems and modern web applications. Holds a degree from California State University, Northridge and has strong knowledge of **Java, JavaScript, Python**, data structures, algorithms, **Git, low-level design**, and distributed systems. Has expertise in developing scalable and high-performance systems that ensure reliable, secure, and available access for customers

Experience

Marketeq Digital Miami, FL
Software Engineer Intern 08/2025 - 11/2025

- Implemented resilience patterns including retries and circuit breakers to improve backend service reliability
- Implemented caching strategies using Redis, reducing database load and improving API response times by 35%
- Collaborated cross-functionally with product and QA teams to define API contracts and acceptance criteria, reducing post-release defects and aligning timelines

LogiNext Solutions Mumbai, India
Software Engineer 10/2021 - 07/2024

- Delivered a configurable real-time form schema customization service, cutting setup time by 40% for 100K+ daily users
- Diagnosed and resolved a critical UPS and McDonald's account failure, restoring order fulfilment for 5000+ impacted customers
- Refactored backend integrations during AngularJS to ReactJS migration, driving an 80% improvement in application responsiveness
- Engineered a geospatial-aware Auto Assignment backend service, optimizing 10K+ daily trip assignments across performance and accuracy
- Launched a serverless AWS Lambda microservice, decoupling workloads and improving system throughput by 50% across 500K+ daily orders

JalaRam Infrastructure Raipur, India
Software Developer 09/2020 - 09/2021

- Refactored MongoDB query flows and indexing strategies, improving data fetch speeds by 35%
- Drove Agile sprints, Git workflows, code reviews, and production debugging for business-critical construction workflows
- Designed high-throughput NodeJS REST APIs on MongoDB, reducing response latency by 25% across construction management services
- Architected real-time bidirectional communication via WebSockets and Socket.IO, enabling live material and inventory tracking across project sites
- Built reusable React.js components with Redux Toolkit state management, scaling the platform to 2000+ active users with zero rendering inconsistencies

Skills

Programming Languages: Java • Python • JavaScript • TypeScript • SQL

Frontend & Backend Technologies: ReactJS • NextJS • AngularJS • Spring Boot • NodeJS • ExpressJS • Apache Kafka

Databases: PostgreSQL • MySQL • MongoDB • Redis

Cloud & Tools: Docker • Kubernetes • AWS • Jenkins • Jest • Mockito • Postman • Git • GitHub • Cursor • GitHub Copilot • Antigravity

Engineering Concepts: Data Structures • Load Balancing • System Design • SDLC • Debugging

Education

California State University, Northridge Northridge, USA
Master of Science in Computer Engineering 08/2024 - 12/2025

Projects

Mesh Pay 04/2026
<https://github.com/ashishnamdeo16/mesh-pay>

- Built Mesh Pay, an offline peer-to-peer payment platform simulating real-world transactions without internet connectivity, using Spring Boot and React
- Implemented a local ledger for on-device transaction storage, device-to-device communication, and delayed sync reconciliation upon reconnection
- Designed the system to model challenges in low-connectivity environments, gaining hands-on experience in distributed consistency and backend architecture

VectorDB AI Engine 04/2026
<https://github.com/ashishnamdeo16/vector-db>

- Built a RAG pipeline in Python and FastAPI with HNSW, KD-Tree, and Brute Force vector search, integrating Ollama for semantic document retrieval.
- Designed a vector database engine supporting document chunking, embeddings, and similarity search algorithms exposed via REST APIs.

Key Achievements

💎 Q1 2023 Cheetah Award
Delivered features with 30% faster turnaround time, earning Q1 2023 Cheetah Award

💎 Customer Issue Resolution
Resolved over 100 critical customer issues, enhancing client satisfaction and retention

💎 Extensive Coding Practice
Solved 500+ DSA problems on platforms like Leetcode and HackerRank
